HANDCRAFTED LIGHTS

Preparation

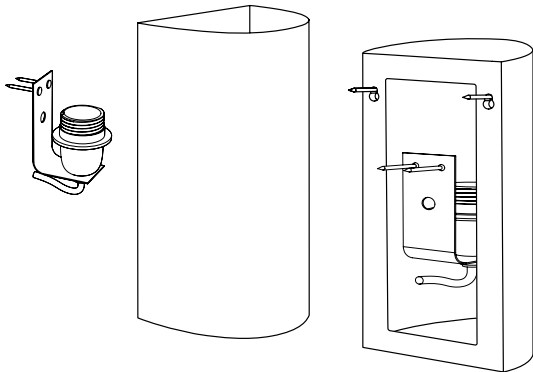

1/

Use two of the dowels and screws provided, fix the bracket to the wall in proximity to an electrical outlet.

Safety warning: you must use a fixing system suitable for your wall to install the wall light permanently. The package contains dowels for easy installation but as each wall has its own specificities, we recommend that you contact a specialist dealer for advice on the right fixings for your type of wall.

Installation

2/

Position the wall light so that the bulb and the electrical wire are in the centre of the wall lamp. Mark with a pencil where the lamp will be placed.

3/

Using the remaining dowels and screws, fix the wall lamp to the wall, then screw in the bulb.
